

TechNova Proposal - Smart Parking System Implementation

1. Introduction

TechNova is pleased to present this proposal in response to RFP SPS-2025-001. As a Saudi-based leader in smart-city solutions, we bring deep domain expertise, proven delivery capability, and full compliance with local regulations. Our team will partner with Riyadh Municipality to design, build, and operate a next-generation Smart Parking Management System that optimizes utilization, minimizes congestion, and elevates citizen experience.

2. Executive Summary

Objective: Deploy 200 IoT-enabled parking sensors, native mobile apps, and a web-based administration dashboard to deliver real-time availability, reservations, and payment services.

Approach: Leverage our in-house Flutter and Angular expertise, STC Cloud hosting (Riyadh zone), and agile delivery methodology-ensuring on-time deployment within the 120-day window.

Benefits:

- Traffic Relief: Dynamic guidance to free parking spots reduces downtown congestion.
- Revenue Uplift: Automated billing and analytics drive optimized pricing and collection.
- Citizen Satisfaction: Seamless bilingual experience (Arabic/English) with 24/7 support.

Budget & Timeline: Total cost of 448,000 SAR; milestones achieved exactly per RFP schedule.

Compliance: ISO 27001, GDPR, Saudi Data Residency, 99.5% SLA, 24/7 bilingual support.

3. Company Profile

Name: TechNova FZ-LLC

Headquarters: Riyadh, Saudi Arabia

Founded: 2018

Employees: 120 (35% R&D)

Relevant Experience:

- Riyadh Expo Smart Parking (300 sensors)
- Jeddah Waterfront Traffic Management
- Dammam Smart-City Pilot

Certifications: ISO 27001, ISO 9001, GDPR Registered Processor

TechNova Proposal - Smart Parking System Implementation

4. Understanding of the RFP

We recognize that Riyadh Municipality's goals are to:

1. Optimize Parking Utilization: Real-time data to reduce "cruising for parking."
2. Improve Revenue Collection: Automated payment processing with municipal systems.
3. Enable Data-Driven Management: Analytics for usage patterns, SLA monitoring, and monthly/annual reporting.
4. Ensure High Availability & Security: 99.5% uptime, strict data residency within KSA, ISO/GDPR compliance.

5. Scope of Work

In-Scope:

- Installation of 200 Parking Sensors and LoRaWAN Gateways
- Flutter-based Native iOS & Android Mobile Applications
- Angular-based Web Admin Dashboard with Analytics
- Payment Integration with Mada, SADAD, Visa/MasterCard, Apple Pay
- RESTful API Development for 3rd-party integrations
- STC Cloud Riyadh Zone Hosting & DevOps pipeline
- System Testing, QA, and User Acceptance Testing (UAT)
- Staff Training & Documentation
- Go-Live Support & Handover

Out-of-Scope:

- Civil works (power/conduit trenches)
- Hardware beyond sensors (e.g., cameras)
- Integration with non-parking municipal APIs
- On-street digital signage installations
- SMS marketing or push notifications module
- Long-term managed services beyond 12 months
