

TechNova Proposal - Smart Parking System Implementation

1. Introduction

UrbanIQ is pleased to submit our proposal for the Smart Parking System Implementation (RFP SPS-2025-001). As a regional leader in modular smart-city solutions, we specialize in cost-effective, rapidly deployable platforms that meet compliance requirements and scale with city infrastructure. Our offering balances performance, affordability, and implementation speed.

2. Executive Summary

Objective: Implement a flexible, modular smart parking system using pre-validated components to ensure a rapid and reliable deployment.

Approach: Deploy 200 Zigbee-based sensors, React Native mobile apps, and a customizable low-code dashboard hosted on AWS Bahrain for Saudi data compliance.

Benefits:

- Reduced Time-to-Value: Deployment 2 weeks ahead of schedule.
- Cost Efficiency: 390,000 SAR total cost with reusable components.
- Practical Support: Remote 24/7 support with SLA guarantees.

Compliance: ISO 27001, GDPR, Saudi Data Residency via AWS Bahrain, Arabic UI support.

3. Company Profile

Name: UrbanIQ Solutions FZ-LLC

Headquarters: Dubai, UAE

Founded: 2016

Employees: 85 (45% product & engineering)

Relevant Projects:

- Smart Parking System, Abu Dhabi (City Center)
- Parking Occupancy Monitoring, Sharjah
- Public WiFi + Smart Parking Pilot, Ajman

Certifications: ISO 27001, GDPR-compliant infrastructure (AWS)

4. Understanding of the RFP

TechNova Proposal - Smart Parking System Implementation

We understand that Riyadh Municipality aims to deploy a scalable and cost-effective smart parking system that:

1. Reduces congestion in commercial districts
2. Enhances citizen convenience through real-time availability and payment
3. Provides the Municipality with analytics, reports, and integration capabilities
4. Meets strict security, data residency, and uptime SLAs

5. Scope of Work

In-Scope:

- Installation of 200 Zigbee-based Parking Sensors
- React Native Mobile Applications (iOS & Android)
- Retool-based Web Admin Dashboard
- Payment Integration with Stripe, Visa, Mada
- REST API and CSV Export Functions
- Hosting on AWS Bahrain for data compliance
- QA Testing, UAT, Documentation, Training
- Go-Live Support

Out-of-Scope:

- Custom hardware development
- SMS integration or non-standard municipal systems
- Local on-site technical support (remote-first model)
- Advanced machine learning analytics (basic reports only)
